Infra-Low brainwaves (also known as Slow Cortical Potentials), are thought to be the basic cortical rhythms that underlie our higher brain functions Very Little is known about infra-Low brainwaves Their slow nature make them difficult to detect and accurately measure, so few studies have been done

## Brain Waves Module 4: Neuroscience and the law

The human brain is not viewed in the same way as other organs The brain holds the key to mind and behaviour, and so to most it has a 'special' status The relatively young field of neuroscience is the study of the brain and nervous system Neuroscientists seek to determine how brain function affects behaviour The law is

### Consciousness as a Function of Brain Waves and Physical ...

consciousness Is consciousness a part of brain or something totally separate from the brain and body? Dualism generally holds that the conscious mind or a conscious mental state is non-physical in some sense, whereas the monism holds that, to put it crudely, the mind is the brain, or is caused by neural activity Brain Waves

### A Beginner's Guide to Binaural Beats Meditation

so does the brain These frequencies are known as brainwaves and are measured in Hertz (Hz) When we are in high states of anxiety the speed of our brainwaves increases, and when we are relaxed the speed decreases This concept is key in understanding how binaural beats work

### Brainwave Entrainment

Brain Response to 10 Hz Entrainment Brainwaves (Before) Brainwaves (After) FFR can be useful because brainwaves are very much related to

mental state For example, a 4 Hz brainwave is associated with sleep, so a 4 Hz sound pattern would help reproduce the sleep state in your brain The same concept can be applied to
